

Official NestJS Consulting

Our goal is to ensure that your developers are successful and productive with NestJS as well as other modern technologies in today's ever-changing tech world.

Official Support

With official support, get expert help directly from the NestJS core team. We tackle your toughest challenges, and collaborate with your team on many levels such as:

- Providing technical guidance & architectural reviews
- **Mentoring** team members
- Advising best practices
- Solving design decisions
- Addressing security & performance concerns
- Performing **in-depth** code reviews

Team Augmentation & Development

With team augmentation, NestJS core team members can work directly with your team on a daily basis to help take your project to the next-level. Consider us "part of your team", tackling the most ambitious projects - right by your side.

NestJS Best Practices

Frequent code reviews can eliminate potentially hazardous bugs & issues at an early stage and help enforce best practices. Let us perform PR reviews & audits to ensure your code quality, performance, and security.

First-hand access

Direct communication channel will boost team velocity, giving a quick access to discuss and solve problems.

NestJS Workshops and Trainings

We provide solid kick-off training as well as more advanced ones that give teams an in-depth understanding of NestJS. We offer on-site workshops and remote intensive sessions which help get you up and running *quickly* within the NestJS ecosystem.

Contact us!

Let's talk how we can help you become successful with NestJS.
